Full-Service
Custom Design
& Manufacturing

Est. 1991

Custom Design

Start from an idea that you or your customers have hand-drawn, or let our designers use top-of-the-line Matrix software to breathe life into your custom design ideas.

3D CAD Renderings

See the end-result of a custom piece through a photo-realistic rendering, from traditional mountings to intricately sculpted pieces. We can even showcase different metal colors, finishes, and stone types.

Realistic Prototypes

JD&Co. leverages state-of-the-art technology, including Solidscape and Tiger resign printers, to produce premium physical models for your designs.

Hand Carving

Sometimes traditional CAD programs and 3D printing aren't enough. Our hand carver has over 40 years of experience, and unmatched sculpting abilities, bringing old-world traditions to modern manufacturing.

Casting & Molding

JD&Co. provides quality platinum, gold, and silver casting using over-pressure technology, an induction melter, and vacuum spin casting. All castings are magnetic tumbled and inspected under magnification.

Setting & Finishing

Our team of bench jewelers and master jewelers painstakingly pay attention to every detail to deliver final custom pieces beyond your customers' expectations.

Unique Jewelry Designs Created by Your Customers

Do your customers have a preferred artistic style they'd like to see brought to life in a beautiful piece of jewelry? Perhaps they envision a unique creation of their own and need the expertise of a skilled artisan to make it a reality. Reach out to our custom design team and start the collaboration process today.

Don't Settle for a Style That's "Almost Perfect"

We can take on a custom piece from any point in the design and manufacturing process. Start from a simple sketch or perfect a piece mid-production.
